

SINUS INFECTIONS

Halotherapy (dry salt therapy)

BREATHE, RELAX & HEAL

Sinusitis

Acute sinusitis causes the cavities around the nasal passages (sinuses) to become inflamed and swollen. This can make it difficult to breathe through your nose and can cause pain around the face and neck including headaches and sometimes dizziness.

How Halotherapy can help

Halotherapy can significantly help chronic sufferers of sinusitis when the dry salt particles deeply penetrate into the sinus cavities, improving drainage and increasing aeration behind the tympanic membrane.
